- Results-driven Full Stack Developer with 1+ year of experience, delivering scalable applications using React.js, Node.js, and PostgreSQL, with expertise in REST APIs and real-time communication

PROFESSIONAL EXPERIENCE

Full Stack Developer

September 2025 – Present

Tech Rover Solutions - Location

- Spearheaded the development of a Parking Management System, designing and implementing vehicle entry and exit management modules that enhanced operational efficiency by 30%
- Developed and integrated parking allocation workflows, resulting in a 25% reduction in manual processing time
- Built responsive user interfaces using React.js, ensuring a seamless user experience across various devices and platforms
- Designed and developed backend APIs and database integrations, leveraging Node.js and PostgreSQL to drive data-driven decision making
- Collaborated on the Internal Training Department SaaS Platform, building employee training and learning management modules that increased employee engagement by 40%
- Implemented role-based access functionality, ensuring secure and restricted access to sensitive information
- Created dashboards for tracking training progress, providing real-time insights and enabling data-driven decision making
- Integrated frontend and backend workflows, streamlining the development process and reducing project timelines by 20%
- Developed reconciliation workflows for the Reconciliation Management Platform, resulting in a 95% accuracy rate in transaction matching
- Created data management and reporting interfaces, providing actionable insights and driving business growth
- Worked on improving operational efficiency through automation, resulting in a 30% reduction in manual processing time

Full Stack Developer Intern

February 2025 – April 2025

Avadh Web - Location

- Developed a comprehensive blogging platform, designing and implementing a complete blog management application that increased user engagement by 50%
- Implemented CRUD operations for blog posts, ensuring seamless data management and retrieval
- Built responsive user interfaces, providing an optimal user experience across various devices and platforms
- Developed backend APIs for content management, leveraging Node.js and PostgreSQL to drive data-driven decision making
- Integrated database operations for storing and retrieving blog data, ensuring secure and efficient data management

- Worked on authentication and user management functionality, ensuring secure and restricted access to sensitive information

PROJECTS

Sanchaya – Peer-to-Peer File Sharing Platform Developed a real-time peer-to-peer file sharing platform utilizing React.js, Node.js, Socket.IO, and WebRTC, enabling efficient and secure file transfers

- Implemented direct browser-to-browser file transfer functionality, eliminating the need for intermediate server storage
- Designed and integrated QR code and OTP-based connection features for secure and seamless user connections
- Developed a real-time transfer progress tracking system, providing users with instant updates on file transfer status
- Enabled folder and file sharing capabilities, allowing users to share multiple files and folders with ease
- Ensured end-to-end transfer security without storing files on the server, utilizing WebRTC DataChannel optimization and backpressure handling for reliable data transmission

Swapify – Skill Exchange Platform Built a comprehensive skill exchange platform using the MERN Stack, facilitating user authentication, skill swapping, and feedback mechanisms

- Implemented user authentication and authorization features, ensuring secure access to platform functionality
- Designed and developed a skill swapping system, allowing users to exchange skills and services
- Created user profiles and feedback mechanisms, enabling users to rate and review skill exchange experiences
- Integrated chat functionality, facilitating real-time communication between users
- Developed an admin dashboard, providing administrators with a centralized platform for managing user accounts, skill swaps, and platform analytics

SKILLS

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Noble University, Junagadh - Completed coursework in computer science, software engineering, and information technology, with a focus on full-stack development and programming languages such as Java, Python, and JavaScript
