PROFILE

As a DevOps Engineer with over 2 years of experience, I specialize in designing efficient CI/CD pipelines, managing containerized applications, and optimizing multi-cloud environments. My expertise spans AWS, Azure, and GCP, leveraging skills in infrastructure as code to enhance operational efficiency and ensure compliance.

EXPERIENCE

DevOps Engineer 04/2024 - Present

Tech Rover Solutions - Junagadh, Gujarat, India

- Designed, implemented, and optimized CI/CD pipelines using Jenkins and GitHub Actions, improving deployment efficiency by 70% and increasing release reliability.
- Built and managed containerized applications using Docker and Kubernetes, ensuring high availability, scalability, and efficient resource utilization across staging and production environments.
- Deployed and maintained multi-cloud infrastructure supporting microservices architecture and mission-critical workloads.
- Implemented secure cloud configurations aligned with CMMC Level 1 & Level 2 compliance requirements, improving access control, system security, and infrastructure governance.

DevOps Engineer 08/2020 - 06/2023

Artium Academy (Online Music Learning Platform) - Rajkot, Gujarat, India

- Designed and deployed scalable microservices-based architecture using Docker containers on AWS infrastructure to support an online music learning platform serving global users.
- Implemented CI/CD pipelines using GitHub Actions to automate build, test, and deployment workflows, ensuring faster and reliable releases.
- Configured AWS services including EC2, RDS, CloudFront, and Application Load Balancer (ALB) to enable high availability, secure access, and optimized content delivery.
- Integrated NGINX reverse proxy to manage traffic routing and improve application performance and security.

DevOps Engineer

Arlow.ai (AI-powered Digital Care Advisor Platform) -

- Designed and deployed scalable containerized microservices architecture using Docker on Google Cloud Platform (GCP), including Cloud Run, Cloud SQL, Cloud Storage, and VM instances.
- Implemented automated CI/CD pipelines using GitHub Actions, improving deployment reliability and reducing manual intervention.
- Supported infrastructure for AI-powered digital care advisor platform providing personalized health guidance, reminders, and proactive recommendations for older adults.
- Enabled secure storage and access of sensitive healthcare-related data including medical records, prescriptions, and care coordination documents using cloud-native architecture.

SKILLS

- Cloud Platforms
- Docker
- Kubernetes
- Linux
- Bash
- Shell Scripting
- RabbitMQ
- Redis
- AWS Cloud
- AWS Gov Cloud
- Microsoft Azure Cloud
- GCP Cloud
- CMMC
- Git
- GitHub
- Jenkins
- GitHub Actions
- Terraform
- CloudFormation
- NGINX
- Prometheus
- Grafana
- CloudWatch
- Portainer
- Microservices

EDUCATION

Bachelor of Technology
Marwadi University

**- Information Communication
Technology**

DevOps Engineer

RiskRelease (Insurance Compliance Automation Platform) -

- Deployed and managed containerized microservices using Docker and orchestrated workloads using Kubernetes (K8s) on AWS Cloud, ensuring high availability, scalability, and fault tolerance.
- Configured and maintained Kubernetes clusters, implementing auto-scaling, rolling deployments, and service discovery for reliable production environments.
- Built and optimized CI/CD pipelines using GitHub Actions/Jenkins, automating build, test, and deployment processes for faster and consistent releases.

AWARDS

Employee of the Quarter

Awarded for excellence in DevOps engineering, improving automation, cloud infrastructure stability, and deployment processes.
